

### **AMENDMENTS TO THE ABSTRACT**

Please substitute the following paragraph(s) for the abstract now appearing in the currently filed specification:

#### **ABSTRACT**

A system and method for speech processing, in which an orthographic input is converted into a phonetic transcription in a first conversion step, and a step of checking and correcting the conversion result by the user is provided, having a second step of converting from the phonetic transcription into a pseudo-orthographic representation and outputting in this representation.
